## FOREWORD – HIS HIGHNESS EMORIMOR

*This directory is the first of its kind listing all the 1,195 clans of the Iteso wherever they are in Uganda and Kenya. Originally, the Iteso were grouped into six main clans. Those clans are the Ikaribwok, Irarak, Ikatekok, Ikomolo, Igoria and Inomu. Later, the Iworopom clan also emerged.*

*Due to various challenges and needs, which include conflicts, search for better land with good pasture and water, some people broke off from these clans and created their sub clans. In this directory you will find that the Ikaribwok created 270 sub clans, while the Irarak created 229, Ikatekok created 217, Ikomolo 60, Igoria 46 and Inomu 26 sub clans. In a similar way, some families broke off and created sub clans what they did not want to have any connection with the parent main clan to the extent that such sub clans can now no longer trace their parent clan. In this directory, such clans are referred to as 'stand-alone clans'. They number 347. There is need to carry out further research to find out the main clans from which these 'stand-alone' clans originate from.*

*We believe that not all the Iteso clans were registered during the registration period. We also believe that there are clans who share names and are, therefore, repeatedly registered here. It is also not easy to know whether these clans that share names are the same or different. Therefore, we believe that the number of the registered clans contained in this directory may either be more or less than 1,195. We hope to review the directory and the Iteso clans so as to produce a refined clan register that includes all clans. However, we advise the Iteso that it is not good for us to continue splitting the clans. We urge the Iteso to remain united in their current clans. If possible, we encourage the current clans who had split away from their parent clans to reunite with the latter. In so doing unity and ICU's delivery of services to the Iteso will be better enhanced.*

*This directory of the Iteso clans is very important. We hope that the directory will help the Iteso who are living in different places to know the names of their clans, to know and link up with their relatives whose whereabouts have hitherto been unknown to each of them. When the people get to know their relatives, love plus unity will ensure and incest or marriage among relatives will be avoided. It is culturally and medically bad for relatives to commit incest or to marry among themselves. First, children born out of incestuous relations are usually both physically and mentally disabled. Many of them become lame, dull academically or slow learners, and others have very weak bodies, and it is common for some to die. Therefore, this directory is very good in warning relatives to be careful during courtship.*

*Accordingly, we urge all the Iteso whenever they meet for the first time, at the time of greetings, to remember to ask to know the names of each other's clans with the view to find out if they are relatives. Getting to know one's clan is very good and important tradition of the Iteso. Our forefathers practiced it to avoid in-breeding. They kept the tradition of knowing relatives and in-laws.*

*Secondly, it is now very easy for the Iteso to link up with their clan leaders. Similarly, as the telephone contacts and addresses of the clan leaders are available in the directory it will be much easier for Iteso Cultural Union (ICU) to link up with all Iteso who will be employed to deliver services to all our people. This means that the directory will make it easier for the Iteso to link up better as they deliver services and promote unity, which is ICU's goal for the people.*

*Thirdly, the Uganda National Land Policy 2013 provides for clan committees as the courts of first instance in resolving all customary land conflicts. Therefore, this directory was produced to be submitted to Government, especially the judiciary sector, to recognize and confirm the clans and their leaders who have the mandate to resolve customary land conflicts.*

*I, therefore, urge all Iteso, especially clan leaders to acquire this directory and use it as a tool that will help them in their duty of leading their clans. We thank very much LEMU and individuals who supported us in the registration of the Iteso clans and the production of this directory.*

**Ekirigi (Prime Minister) – Iteso Cultural Union, Soroti, 14<sup>th</sup> February, 2017**

## **ACKNOWLEDGEMENT**

*The Office of His Highness Emorimor Papa Iteso together with the Iteso Cultural Union (ICU) warmly thank the various organizations and people for their enormous contributions which enabled the production of 'The Directory of the Iteso Clans'. A lot of resources – time, energy and money – was used to support the production of this directory.*

*ICU alone would not have been able to produce this book. The production of this book required a lot of funding. ICU did not have such money. **TROCAIRE, an Irish International NGO** funded Land and Equity Movement in Uganda (LEMU) to provide financial and technical support for the production of this book. LEMU began supporting ICU in this project in 2012. Up to date it took five years. That was a very long time and a lot of LEMU's money was used in the production of this directory. Emorimor together with ICU are very grateful to LEMU and her staff, especially Miss Judy Adoko the Executive Director, Mr. Samuel Eriaku the former Project Manager and Mr. Ivan Duthan Opolot the current Project Manager, for their support.*

*We also know that LEMU have their supporters, especially funding partners. We sincerely appreciate the support from Trocaire to LEMU which in turn supported ICU in this project.*

*Within ICU also, many people did a great job in supporting the production of the directory. These include ICU cabinet, district and sub county chairpersons, and secretariat staff; Miss Damali Ayumo the Administrative Assistant. These people put in a lot of effort in distributing and collecting the clan registration forms in all the villages wherever the Iteso are in Uganda and Kenya. We also commend the effort of the 1,195 clan leaders who performed the duty of filling and returning the clan registration forms. We thank the clan leaders for fulfilling the requirements of the clan registration process in time.*

*In a special way, we thank the ICU Deputy Minister of Information and Documentation who is also ICU's deputy spokesperson, Jonathan Maraka Ariong, for his diligent effort as the Chief Coordinator in the registration of the clans and their taboos, exultations and symbols contained in the directory. He also worked at his lap top computer day and night to design and make the layout of this directory.*

*It is now the responsibility of all Iteso, especially all clan leaders, to acquire this directory and use it to help them in serving the Iteso clans. Thank you.*

**EMURIA KOLIA!**

**Rt. Hon. Paul Sande Emolot**

**Prime Minister – Iteso Cultural Union, Soroti, 14<sup>th</sup> January 2017.**

## THE ORIGIN OF THE ITESO AND THE MEANINGS OF THE NAMES OF THEIR CLANS

---

All people in the world, including Iteso, are descendants of Noah, the only righteous man and his family who God saved in the famous Noah's Ark after all people that had been living in the world were destroyed by God in a flood because of their sins. Noah had three sons; namely; Shem, Ham and Japheth (Genesis 9:18-19). Noah's sons are the greatest ancestors of all people now living all over the world. Noah's sons and descendants multiplied and scattered to settle in all places all over the world. The Iteso are descendants of Ham. Ham gave birth to Cush (Ethiopia), Mizraim (Egypt), Put (Libya) and Canaan (Genesis 10:6).

Cush and his sons later went to settle in the land which was later called Ethiopia or Abyssinia. These people were crop farmers and pastoralists. For various push and pull factors, including conflicts, the search for water, fertile land and pasture for themselves and their animals, in 1300 AD some of Cush's descendants who later came to be known as ITUNGA left Ethiopia and moved southwards. They entered and first settled in a place now called Turkana, north of Kenya. In their continued pursuit in search for water, land and pasture, some of the ITUNGA split off. They left Turkana, moved and settled in a place called Moroto, now referred to as Karamoja, north-east of Uganda. The group that remained in Ethiopia were called Nyangatom, while those who settled in Turkana were called the Turkana, while those who settled in Moroto came to be known as the Karamojong. Another split of the ITUNGA took place in Karamoja. One group left Karamoja, went northwards and settled in the south of the country now called South Sudan. These people came to be known as the Toposa. A second group left Karamoja in 1700 AD and moved southwards and entered a place called Angisa in Magoro, part of a place which later came to be called Teso. The group of ITUNGA who settled in Magoro came to be called Iteso.

From Magoro the Iteso scattered to the north, west and south. The group that went north settled in the current Usuk area (Katakwi district), while the group that went west settled in areas now known as Soroti, Serere, Kalaki and Kaberamaido. Those who went south crossed Lake Bisina and settled in places now called Ngora, Kumi, Bukedea and Pallisa where some proceeded south eastwards to settle in Tororo, Busia and western parts of Kenya.

The sons and descendants of Ham are the people referred to as Hamites. Cush and his descendants moved and settled along the (River) Nile basin and so came to be referred to as 'Nilo Hamites.' Thus, Iteso are referred to as part of the 'Nilo Hamites' ethnic group.

At the time of settling in the current Teso land, the Iteso were grouped into only six clans, which are referred to as the 'main clans' in this directory. These clans are the Ikaribwok, Irarak, Ikatekok, Ikomolo, Igoria and Inomu. A clan is a group of families coming from one man or place as their common ancestor or origin and are governed by particular cultural norms and taboos. A clan shows people who are relatives. A clan is also the basic cultural administrative unit and building block of the Iteso and the Iteso Cultural Union. Each clan has a highly revered leader who is their administrative head. The Iteso clans are the basic and very important cultural administrative units that are the foundation and building blocks of the Iteso Cultural Union, the institution constitutionally recognized by the Uganda Government as one that culturally binds the Iteso together under their paramount leader, the Emorimor. All services of ICU are administered to the subjects through the clan leaders. ICU derives her powers and authority from the clans.

Each of these clan names derive the meanings from their respective attributes as follows:

**Ikaribwok:** This clan is also referred to as 'ikaruok' or 'ikarebuok'. These are battle-hardened warriors or fighters. Their brave and brilliant skills in battles made them the army to provide security for the Iteso. The word 'ikaruok' refers to people who make sounds of victory after winning a battle. This clan is the largest

clan among the Iteso.

**The Irarak:** From the time the ITUNGA left Ethiopia (Abyssinia) these people were gatherers (ikerarak) of wild fruits and highly skilled animal hunters to feed the Iteso. Their great father was called Ojuruta who was well-known hunting trainer. Their women, too, were great in fishing. Members of this clan are the ones commonly found telling stories about fruit gathering and hunting. This is the second largest clan among the Iteso.

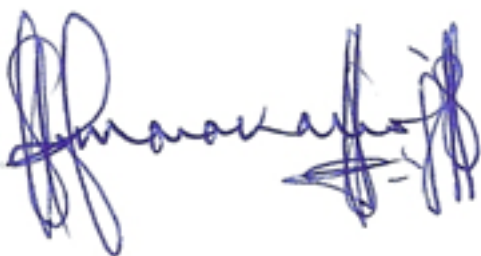

**Ikatekok:** These people are good at mediating (aitikokokin or aipur) conflicts between people, families and clans over land, waters, pasture, etc. and administration. So the word 'ikatekok' come from the Atesot word 'aitikokin'. Being good mediators, they also became good administrators who ensured discipline and conformity to the cultural norms of the Iteso and to punish errant members. This is the third largest clan among the Iteso.

**Ikomolo:** The name 'Omolo' is common among the Luo tribes (Acholi, Lango, Jopadhola, Jaluo of Kenya). The Ikomolo are children resulting from intermarriage between the Iteso and the Luo. That is why they are called Ikomolo (child of Omolo). They are people well-known for cursing. That's why we hear of some of them called Ikomolo 'Amug'/Ituol' (Ikomolo who do not want to see live gourds in their live plants). When they see this gourd, it will wither and dry up, unless they knock on one of the gourds and they select one to be owned by them.

**Inomu:** These are the strong traditional medicine men and women of the Iteso. To date, the Inomu still practice traditional medicine, especially the orthopaedic treatment. They are the Iteso orthopaedists to whom people with sprains, fractures and muscle pains go for massage and bone fixing. They are experts in all wild medicinal plants and their parts that treat a range of ailments. But their main specialty is orthopaedics. That is why some of them are referred to as 'Inomu Ikariok' or 'Inomu Ariok' – meaning 'Inomu' the people who mend fractured bones and sprained joints and muscles'. This means that they had a big role to play in treating the Iteso fighters who got wounded or injured in battles.

**Igoria:** Igoria is the name of a small bird called hooded finch in English. This bird is smart, humble and organized. They make smart and nice nests. The women of this clan are experts in thatching grass huts. In the same way, Iteso of the Igoria clan are good architects and builders. They are equally very good at crafts and making furniture.

**EMURIA KOLIA!**

**Jonathan Maraka Ariong**  
**Deputy Information and Documentation Minister/Spokesperson**  
**Iteso Cultural Union, Soroti**

## ATEKERIN NUKA ITESO/THE ITESO CLANS
